

Machine series **DRA**

Immersion cleaning system

Universally applicable system for cleaning individual parts and bulk materials using the immersion process.

- Cleaning on water or solvent base
- Precisely controllable oscillation through pneumohydraulic converter
- Individually configurable cleaning chamber (heating and/or ultrasonic on all 5 sides of the tank)
- Very stable construction for high load weights
- Easy operation thanks to mass balancing on the front door
- Latest generation PLC control with touch panel, internet-enabled
- Easily accessible maintenance area
- High-quality system components from well-known manufacturers
- Extensive options (filtration circuit, oil separator, aerosol filter, spray nozzles, vibration unit, explosion protection and much more)
